

SOFTWARE COMPETENCE FOR THE TOBACCO INDUSTRY

CONNECT · MOVE · ANALYZE · OPTIMIZE

KÖHL Maschinenbau delivers complete software solutions for industrial automation and logistics. We focus on optimizing your processes through innovative and reliable technologies and customized systems.

Industrial Production Control
& Automation

Product Quality Control
& Traceability

Data Analytics
& Predictive Maintenance

Supply Chain Management
Regulatory Compliance

COMPETENCES

CONNECT

- **OPC UA:** Secure & standardized communication between the systems
- **Tobacco Machine Communication (TMC):** Control & optimization of production & transport processes
- **Track & Trace Solutions (T&T):** Full tracking along the value chain

MOVE

- **Warehouse Management Systems (WMS):** Efficient management of inventory & warehouse processes
- **Material-Flow-Control:** Optimization of material flow through intelligent control systems
- **Forklift Control Systems (FCS):** Efficient control & monitoring
- **End-of-Line (EOL):** Automation solutions for the end of production lines

ANALYZE

- **Reporting and Data Analysis:** Detailed analyses & reports
- **Production and Performance Monitoring (PPM):** Real-time monitoring of production performance
- **Alarm and Event Management:** Rapid response to critical events through effective alarm management

OPTIMIZE

- **Manufacturing Execution Systems (MES):** Real-time monitoring & Control of production processes
- **Manufacturing Operations Management (MOM):** Informed decisions through comprehensive data analysis
- **Primary Batch Simulation**
